## Digital Breadcrumbs: The Heightened Cyber Risks of Your Mobile Workforce

**MARC BURROWS**  
Head of Global Mobility Services

Wifi hotspots, digital purchases, social media posts. There are hundreds of digital data crumbs left behind by business travellers that increasingly create security risks at home and abroad as well as compliance exposures in the destination country. Authorities are using this information to identify non-compliance with employment conditions, tax, immigration and laws governing social behaviour. Enforcement activities, penalties and sanctions for infringements have become more aggressive in many markets. Criminals are also using traveller's digital information to plan more calculated attacks. Being aware of where risks are concentrated, and the digital breadcrumbs that lead to them, is key to effective risk management and delivering on your Duty of Care in a sustainable way.

**ABB**

## Safe and Sound - Hotel Security Standards Necessary to Ensure Business Continuity

**STAFFAN JANSSON**  
Head of Crisis Management & Security APAC Region

Heightened incidents taking place in hotels around the world have highlighted the necessity for organisations to implement plans to mitigate accommodation related risks. Staffan Jansson, Head of Crisis Management and Security, APAC Region, at ABB will share best practices in ensuring your travellers stay protected while ensuring business continuity.

**IPSOS**

## Our Future Workforce - The Myths and Realities of Millenials

**XIAORAN WU**  
Ph.D. Executive Director, Head of CKR

As a generational cohort, their outlook on life and preferences have been characterised by the emergence and growth of the internet, along with rapidly changing social attitudes. Ipsos will reveal the research trends and realities that organisations need to consider in order to support what will be our future workforce.

**GLOBAL ROAD SAFETY PARTNERSHIP**

## Road Safety: The Major Cause of Medical Evacuations for Business Travellers

**DAVID CLIFF**  
CEO

Every year, road crashes kill over 1.35 million people, which equates to over 3,700 deaths every single day. Additionally, an estimated 37,000 people are seriously injured in preventable road crashes per day. David Cliff, CEO of the Global Road Safety Partnership, will reignite the focus that is desperately needed for organisations to reduce road related deaths and injuries, a major risk to their mobile workforce.

**ENHESA**

## Mitigating Human Capital Risks and Occupational Health Challenges in China

**ELLEN ZHANG**  
Expert Service Manager, Head of China Office

China, an engine of economic growth, saw a 6.9% increase in GDP in 2017 and now has a workforce of around 776 million people. This momentum has created a shift in the regulatory structure on occupational health and compliance for all organisations operating in the country. Regulatory compliance experts at Enhesa review the main challenges, requirements and how to best navigate the legal framework.
